Something's Coming . . .

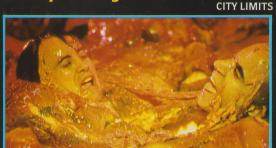

Prepare to voyage beyond the imaginable into a nightmare world where one man's quest for the ultimate experience has unleashed a force more terrifying than anything that has haunted even the darkest dreams.

'From Beyond' is a gruesome tale of horror based on H.P. Lovecraft's classic tale of suspense. Are you brave enough to see what waits to come calling 'From Beyond'?

"If you thought that horror films had reached their gruesome peak with 'The Fly', then prepare to have your stomach churned even more by the sheer gore of From Beyond."

NO. 1 MAGAZINE

"Some films are wonderful just for their intensity. On this score, Stuart Gordon's sequel to 'Re-Animator' is uncompromising."

"The return of real fear. real depravity, to the horror film.
