

What Did I Do

with the  
City of Steel  
Script?

BGC  
1

Translator's note

- 1 I was not sure which transliteration to use to describe the biologically cloned robots (main feature of this trilogy). I picked the simple BUMA (Closest to what it is written in Japanese) But It could very well be VUMA, VUMMA, VUMER, BOOMA, BOOMER, or VOOMER

Please pick the correct one or find out the originally intended spelling.

- 2 Among these four brave girls, Priscilla (who seems to appear most on the screen) acts in a slightly different way than others. She talks in masculine dialect throughout the script; she talks in blunt, tough, no flare no nonsense way despite her deeply caring personality which reveals as the story unfolds. It would be nice if her unique tone is kept in the final English script and possibly for dubbing voice.
- 3 "Genom" is pronounced with a hard G in the Japanese script as in Gh.

These are the ones who call themselves  
Nightsavers.

Director

They are...what do they want for their work?

Assistant

Sir! We are not too sure yet, but they  
do demand reward money. That is they can be  
employed with a fee.

Director

Huuuum... They are quite good...  
I sure like to obtain them and analize them.

Assistant

What do you think, Sir? Shall we try to  
approach them?

Director

The mistake we made this time....it is not  
to be made public. It is a top military  
secret for our institution.  
Go ahead and employ them.

Assistant (off) Yes, Sir.

(off) You talk about trade friction. But the  
countries all over the world are after the  
Genom products and competing with each other  
to obtain our merchandize...  
(continue to next page)

Quincy

.....That's right....take a look at the automobile market.... Genom cars at present have the 68% share of the entire automobile market in the world.. (the other end of the phone talking)....Don't worry about it! .....Yes.....Bumas for military use? (the other end) You are talking about that again?

Mason appears and standing in the rear

(the other end) It is and important and essential export item especially to the countries currently engaging in the limited-area-warfares.... I believe the item has contributed a great deal for the prosperity of our nation today.....Yes..(other end)....Yes...Of course if you just show us your support....I will personally guarantee you we'll do anything in our power for you to obtain the position of the Prime Minister..... Yes, yes, of course....Just trust me..!

Mason takes the receiver and hangs it up

Nason (on/off)About the Collection you were thinking about acquiring... I let the messengers carry them out of the USSD.

Quincy

Good! It was an important aquisition for the Genom Enterprise Group if we want to expand in the future.

Quincy

That's a very precious Collection, so take a good care of it!

Mason

It will be delivered to your office within the next twenty Four hours.....

Quincy

I am leaving you in charge of everything related to that. Just don't forget that the Genom Group is a legitimate corporation. Don't forget that. Avoid publicity as much as possible.

Mason

Yes, Sir. I am very aware of that.
