What you can learn from this video cassette:

This technique for learning how to read the Tarot cards is unique in comparison to almost all other approaches. Instead of memorizing the cards, the student learns how to use his intuition, allowing information to flow from the higher levels of mind. The use of this technique will not only improve the quality of a reading, but will also open the door to greater intuitive and psychic ability.

Richard Gordon travels internationally providing individual counseling as well as presenting lectures and workshops on various metaphysical subjects.
